Corporate Compliance Program
The Corporate Compliance Program has been established by Baptist Health to promote the organization's culture of compliance. The Program offers employees, physicians, and vendors information regarding our commitment to the highest ethical and legal standards. It also provides the resources needed to monitor activities within the organization to assist in preventing, detecting, and responding to potential violations of our Code of Ethics.
Every employee should know that:
Karen Brady, Vice President of Audit and Compliance has been appointed to the position of Corporate Compliance Officer. Click here to access contact information.
The Code of Ethics outlines each employee's responsibility under the Corporate Compliance Program. Click here to access the Code of Ethics.
Any suspected or potential violation of the Code of Ethics should be immediately reported. Employees who make a report in good faith will not be retaliated against for making that report. Click here to get information about reporting a concern.
Annual compliance education is required for every employee. Click here to see some sample education programs.
The Audit and Compliance Department administers the Corporate Compliance Program on behalf of the Audit and Compliance Committee of the Board of Trustees. Policies and procedures have been established to outline the responsibilities of the department and the organization's commitment to the highest ethical and legal standards. Click here to access the policies and procedures.
